PROFESSIONAL SUMMARY

Digital Transformation and Procurement professional with 1+ years of Fortune 100 client experience delivering AI-led enterprise transformation. Specializes in Agentic AI deployment, Generative AI solutions, Intelligent Automation, LLM orchestration, and Source-to-Contract (S2C) process optimization. Proven track record of delivering 3.5 FTE capacity gains, 5,500+ annual hours saved, and enterprise AI transformation roadmaps across global procurement functions.

WORK EXPERIENCE

GEP Worldwide | Navi Mumbai, India

Senior Sourcing Analyst – Procurement & AI Transformation | Fortune 100 FMCG Client | 02/2025 – Present

- Spearheaded AI-led Source-to-Contract (S2C) procurement transformation, driving cost optimization and business value realization through intelligent automation — delivering 3.5 FTE capacity gains with 6.5 FTE in pipeline.
- Architected and deployed Agentic AI and Generative AI solutions using Microsoft Copilot Studio and LLM orchestration, enabling end-to-end AI solution deployment across RFx automation, KPI tracking, and workflow orchestration.
- Automated end-to-end supplier communication using Microsoft Power Automate and AI Builder, eliminating manual outreach and saving 1,920 hours annually across the delivery team.
- Led global spend analysis across 10,000+ suppliers (4 quarterly cycles) and a EUR 26.15M packaging spend assessment for a top 5 global pharmaceutical company across 2 major regions.
- Owned a 3-FTE global governance workstream covering Supplier Financial Stability Reviews (285+ suppliers, 75+ countries), Annual Turnover reporting, and Project Adherence controls — improving risk visibility and compliance reporting.
- Partnered with Digital Transformation team to co-design enterprise AI transformation roadmaps, supporting digital strategy execution, operating model transformation, and large-scale business transformation initiatives across multiple enterprise client engagements.
- Designed a custom AI onboarding agent and structured training program; delivered Agentic AI and intelligent automation enablement sessions across cross-functional teams to drive enterprise-scale adoption.
- Optimized workload planning for a 70+ member multi-country delivery team, improving day-to-day execution efficiency and resource utilization across global operations.

AWARDS & HONORS

GEP Innovator Award (Company-Wide, Global) (2025)

Recognized for pioneering Agentic AI and Intelligent Automation-driven procurement transformation at enterprise scale.

GEP Eureka Innovation Award (2025)

Recognized for innovation in AI-led procurement transformation.

Global Townhall Presenter (2025)

Presented an enterprise-ready Agentic AI Smart Agent solution at GEP Global Townhall, showcasing large-scale digital procurement transformation in action.

Top 10 Finalist, GEP AI Hackathon (107+ teams) (2024)

Built a smart agent workflow for spend consolidation and compliance flagging using real-time spend data analytics.
